

It was fun day today. The children explored the environment with confidence and enthusiasm.

Educators and all the caterpillars welcome *Na* into the group.

Craft

As harmony celebration is approaching we learnt and created people around the world through craft. Children had opportunity to choose the gender of the person they want to create. Then glue their features like eyes, hair, mouth, and nose and small pieces of materials as their clothes.

We also encouraged children to bring something from their background to share. *Jo* brought two books for the caterpillars to read and share.

Sensory

Making sand castle and cooking were what kept the caterpillars busy. *Sw* made sand castle, she placed leaves on it and said, '**this is castle**'. *Jo* pretended to cook by scooping sand with a spade into the sink and stir it up.

Learning skill: creativity, concentration, learning about multiculturalism, pretend play and sharing.

Construction

Ma built different colours of Lego on a board and said '**house**'.

Learning skills: Concentration, creativity, coordination.

Group time

We explored our **identity** through children individual photos. Children looked at themselves and talked about colour of their hair, their facial features like two eyes, ears, one nose and a mouth. *Sw* said, '**my hair is kind of black**'.

We also practised the harmony concert.
