

## Mother's Day Celebration

Date: 11/05/2018

### Children's performance

The children confidently presented the concert for their mothers by singing and dancing to the songs that we have been practising for last few days for their mothers. They danced rhythmically to the music and remembered the lyrics of the songs they had been practising.

**Learning areas:** music and movement, learning language, gross motor coordination, confidence, memory skills

### Wishing happy Mother's Day

At the end of the concert, when we presented the two Banana cakes (a round & a heart shaped), all the children sang Happy Mother's Day for their mummies. The children had participated in the cake making and decorating experience along with Ms S. They explored the ingredients and observed how the texture, colour and taste changes by cooking.

**Learning areas:** fine motor skills, scientific skills, learning about measurement, expressing emotions

### **Dental Therapist visit**

The dental Therapist presented a talk on how to look after our teeth and gave some useful tips to children and mothers on how to assist their children to maintain healthy teeth. The children also pretended to be dentist and practiced brushing the teeth of the animal props. They also had a pretend session of a dental visit on a dentist's chair.

**Learning areas:** self – help skills, developing awareness about maintaining healthy teeth, receptive

### **Giving Presents to mothers and eating together:**

The children presented their beautiful cards and flower pots to their mummies with pride. They also explained their mothers how to take care of them by placing the flower pot in the sunlight and watering it appropriately using watering can.

The children and their mothers enjoyed eating healthy snacks together.

**Learning areas:** sense of achievement, belonging and pride, expressing emotions, communication skills, developing sense of community
