

It was beautiful and sunny day. The caterpillars spent time engaging in play dough experience at the outdoor play area. They showed great interest in this experience as they explored and discovered amazing things play dough can be used for.

*Ka* rolled the playdough flat then placed ginger bread man cutter on the flat play dough. He pressed it down with his both hands to cut the ginger bread man shape. He showed it to all the children at the table. After that, he also used it as a puppet to talk to the children saying *hello, hello*.

*Ma* looked at it and said to *Ka* ***put eye on him***.

They all explored the play dough in a creative way. *Ma* rolled the playdough and cut some butterflies and Christmas tree shapes. She also made pretend noddles with playdough plungers. *Or* and *Al* also cut out some butterflies with cutters.

*Ka* engaged in complex sensory motor experience. He used the truck to scooped sand into the pavement level it and ride his truck on.

**Learning skills** ; creativity, fine motor, language, cooperative concentration and coordination
