

Amazing constructions:

Tr created a dragon using curve connectors. He put the little pieces together to create his dragon. He made a connection between experience, concept and processes.

W created a robot by using Legos. He manipulated the resource to invent and construct a robot.

Learning area: Fine motor skills, creative play

Celebrating Reconciliation week

We talked about reconciliation week at group times. The educators introduced the stories expressing the history of Australia. The children and educators observed the Australian map, Aboriginal people and culture. The educator staged the story of the invasion to the children, showed a video for the children to understand the historical happenings. We read dream-time stories and also talked to the children about the local Aborigines - the Wangal people. The children's learning about history and our indigenous people was reflected through their own story and drawing.
