

Avoid:

cups with teats / spouts / valves that baby has to suck on.

Developed October 2005 by the Bankstown Community Nutrition Team.

Put your baby to bed without a bottle

3 good reasons to give up the bottle

Babies that continue with bottles after 12 months are more likely to get:

- tooth decay
- ear infections
- iron deficiency

Revised by NSW Oral Health Promotion Network and sponsored by:

2011 - SHPN: (COHS) 110267

At 6 months

Baby has mainly breastmilk or infant formula. Put your baby to bed without a bottle.

- drink cool boiled water
- use a cup.

6-12 months

Baby still has breastmilk or infant formula.

- drink from a cup
- eat family foods.

12 months

Baby gives up the bottle and drinks from a cup.

By 18 months

Baby is:

eating independently

Breastfeeding may continue past 18 months if it suits mother and child.

What your baby can drink

6-12 months	breastmilk (recommended)infant formulacool boiled tap water
	 breastmilk (recommended) plain full cream cow's milk (up to 600mls/day*) water (when thirsty)

* or other dairy food. 200ml milk = 200g yoghurt = 1 slice cheese
