

18-07-03

Beautiful winter sunny day. The caterpillars explored the environment with confidence and enthusiasm. We started the day with cotton buds painting - Sw, Ka, Or all participated. It encourages their coordination, fine motor, concentration and creativity skills.

Ka scooped sand into a bowl and place it in the oven. Sw constructed a bird with clipping clives blocks and said to Ms T 'the bird is flying away'.

Or enjoyed pretend play as she wrapped a baby and placed it on her chest. She walked around the environment cuddling the baby.

Na used his counting skills to explore the environment. He unpacked the shape box, counted the shapes then packed it back in the box. He also played with animals.

Leaning skills; counting, pretend play, coordination, creativity, language and concentration.
