

It has been wet weather, but caterpillars had a fantastic time exploring and participating in various experiences in the environment.

Shopping was one of the experiences caterpillars have been exploring and interacting with each other. As pretended to buy the hand cream from *Al* as she pretended to be the cashier. *Al* and *Sw* also bought their items from *Or* and *Ma* went shopping with her baby and bought her item from *Sa* using pretend money. The children used language to express and took turns during the play. Educators supported the children by cutting small pieces of papers and writing numbers 1-10 on it and the children used it as money.

Learning skills: Give and take, counting, awareness of money, social play, expressive language.

The caterpillars are using their creative skill to create, build and solve problems. *Or* used wooden blocks to create fence which she arranged the animal in it. *Ka* built fire fighter robot with Lego. And *Al* tried to complete an 8 pieces puzzles, which she did with a little bit of help from the educator. Learning skills: coordination, concentration, organisation and language.
